Aktuelle Szenarien

IDABUS Portal + MIM

IDABUS + MIM

■ MIM Sync ■ MIM Service ■ IDABUS Portal

■ MIM Sync + CAs ■ IDABUS Engine ■ IDABUS Portal

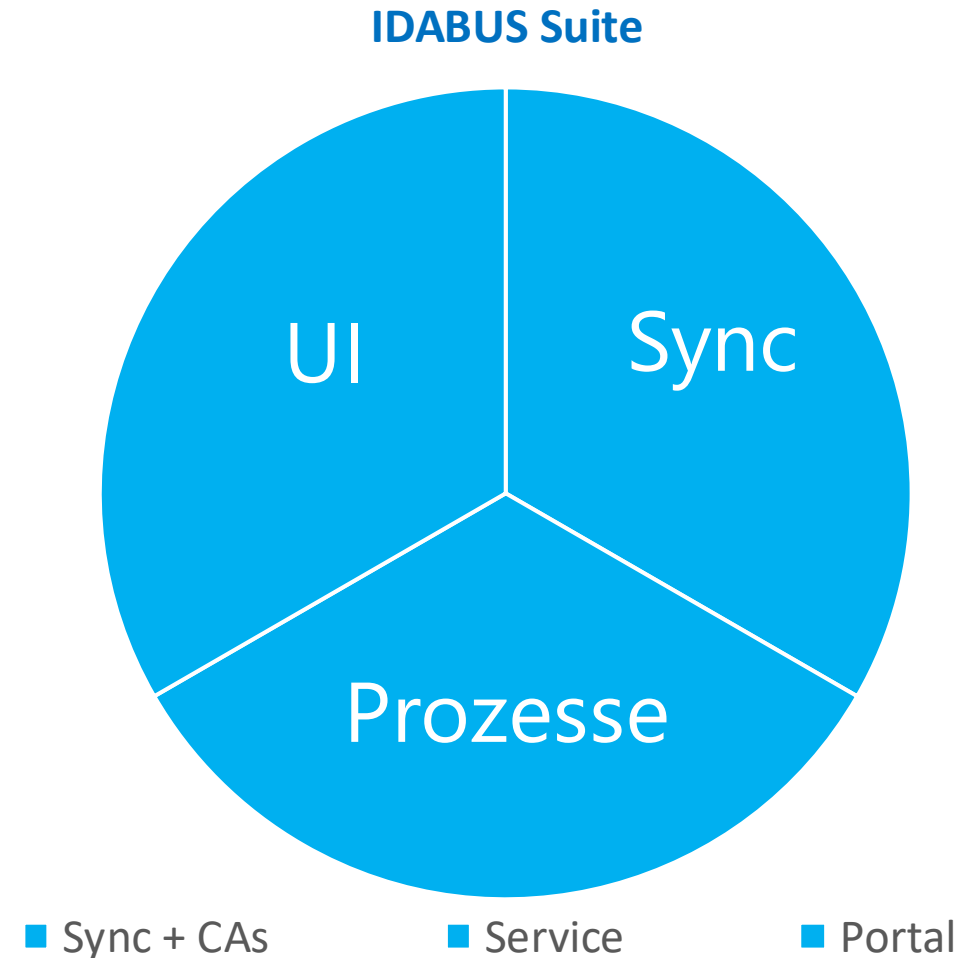

MIM Ära geht zu Ende ...

- MIM Service kommt bereits an die Grenzen
 - End of Support Sharepoint 2017/2019
 - Kein onPrem "Nachfolger" von Microsoft – nur rudimentäre Cloud basierte Sync Funktionen
 - Keine neuen Funktionen mehr trotz SP3
 - Bereits 2018 Treffen mit MSFT PG → 2021 erste IDABUS Engine Version
- ✓ **Viele Migrationen auf IDABUS Engine (Cloud und erste auf onPrem)**
- MIM Sync noch günstig bis Ende 2028 – aber:
 - Umstellung auf SP3 nötig (*aktuelle Server Infrastruktur*)

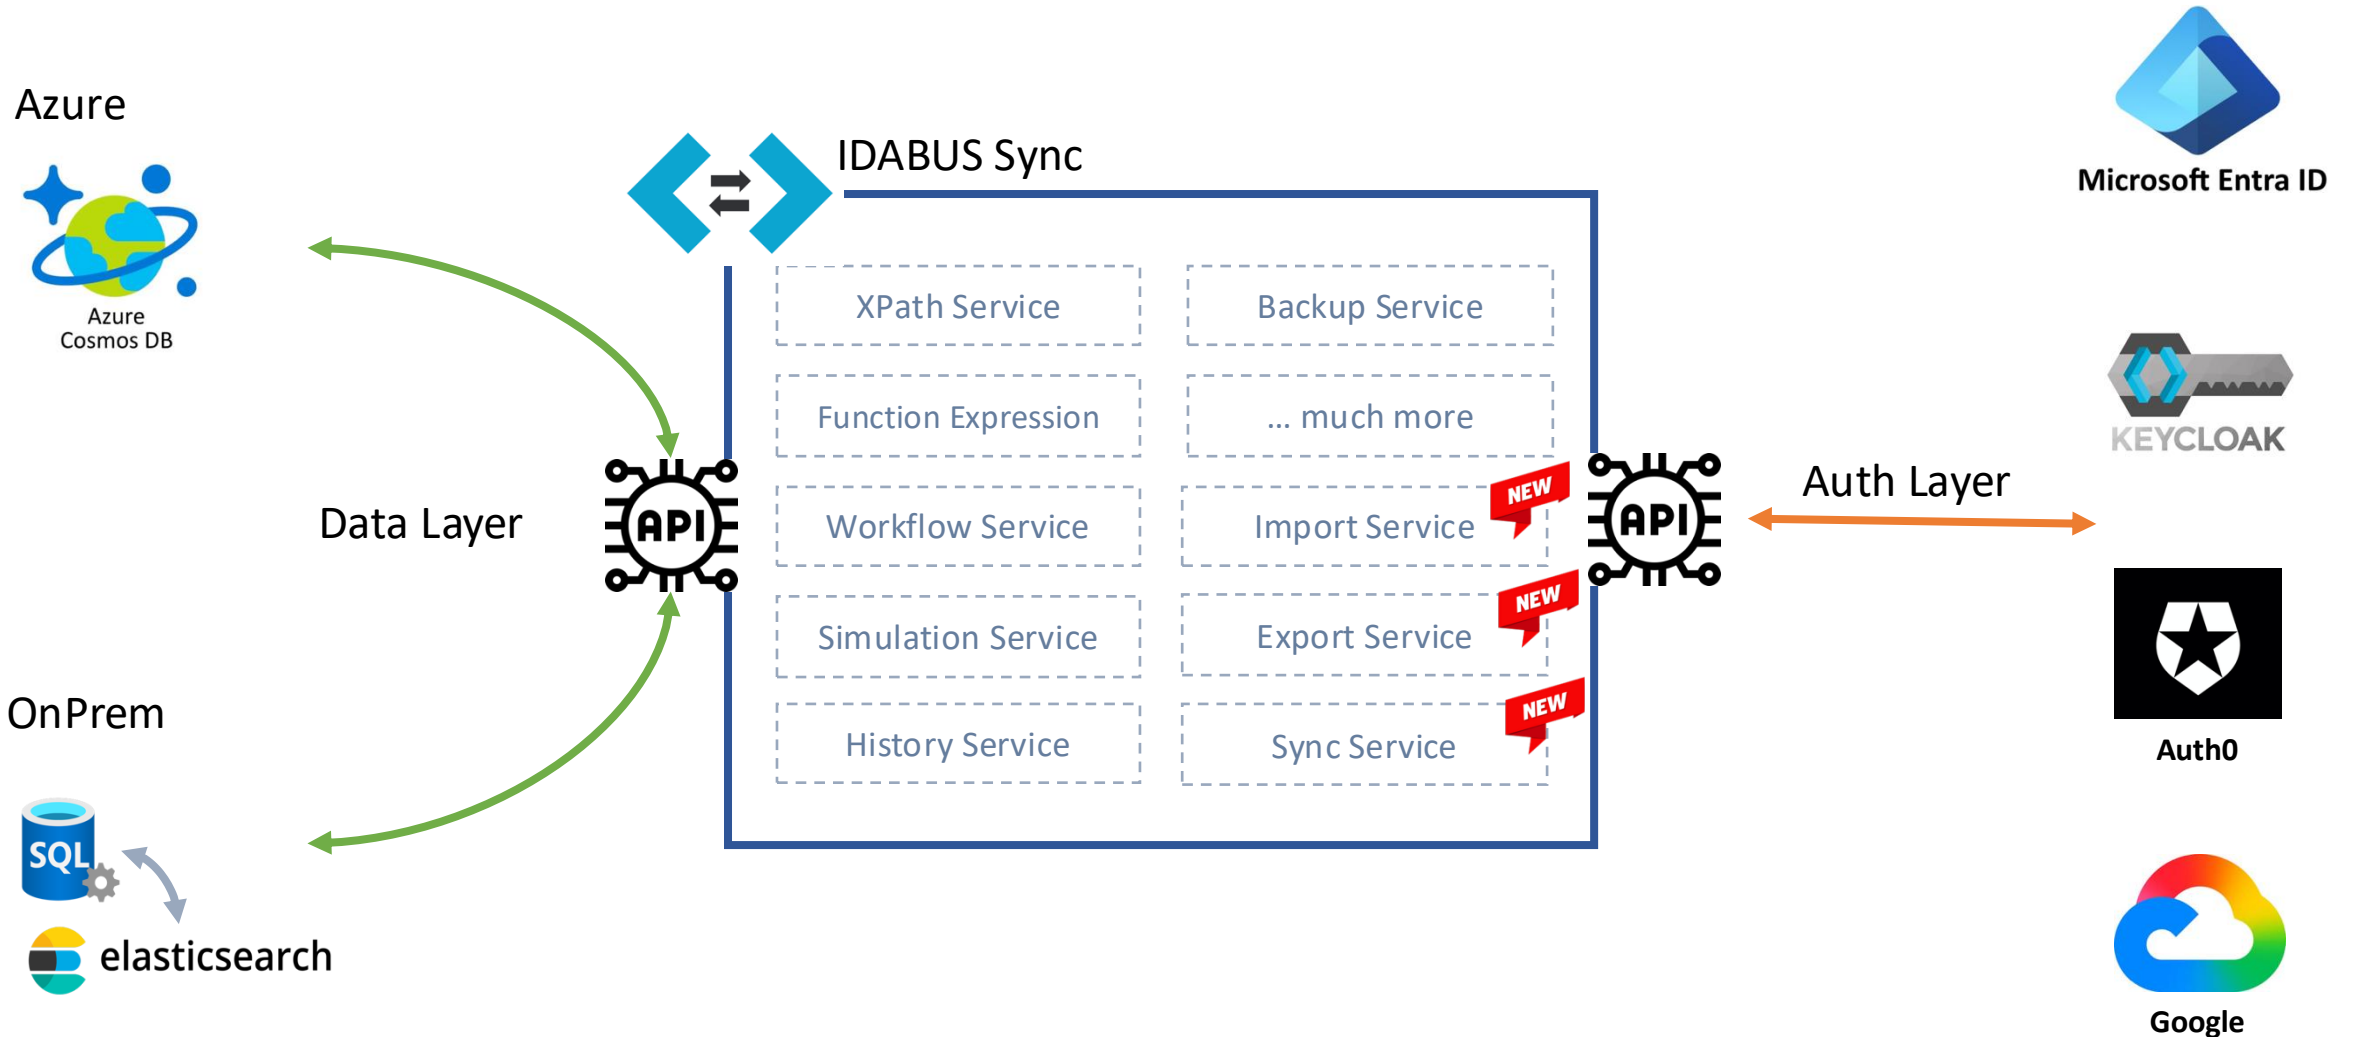

Die Zukunft - eine Suite für alles

- ✓ IDABUS Sync – kompatibel zu MIM Sync
- ✓ Einfache und schnelle Migration von
 - ✓ Management Agenten
 - ✓ Attributflüssen
 - ✓ Schema
 - ✓ MA/MV Extensions
- ✓ Integration in IDABUS Portal
- ✓ Gleiche Infrastruktur (onPrem oder Azure)
